

Outline of Talk

- **What Is Policy?**
- **How Does Policy Map to Reality?**
- **How Do Policy Standards Fit Together to Make a Policy Framework?**

3

What Is Policy?

- **A goal statement**
Allow HTTP traffic from engineering to the company server
- **Configuration specifies the mechanism**
On this firewall allow HTTP traffic on interface 3 from 192.168.45.0 to 128.100.15.56

4

Policy Targets

- Security
- Quality of service
- Routing

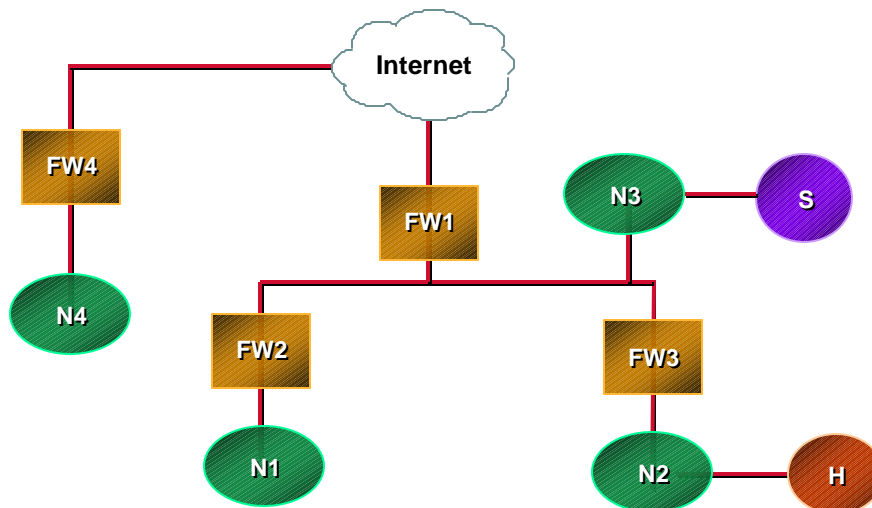

802

6

Policy Translation Steps

- **Define topology**
- **Define policy rules**
- **Compile policy rules to specific device configurations**

802

www.cisco.com

7

Topology

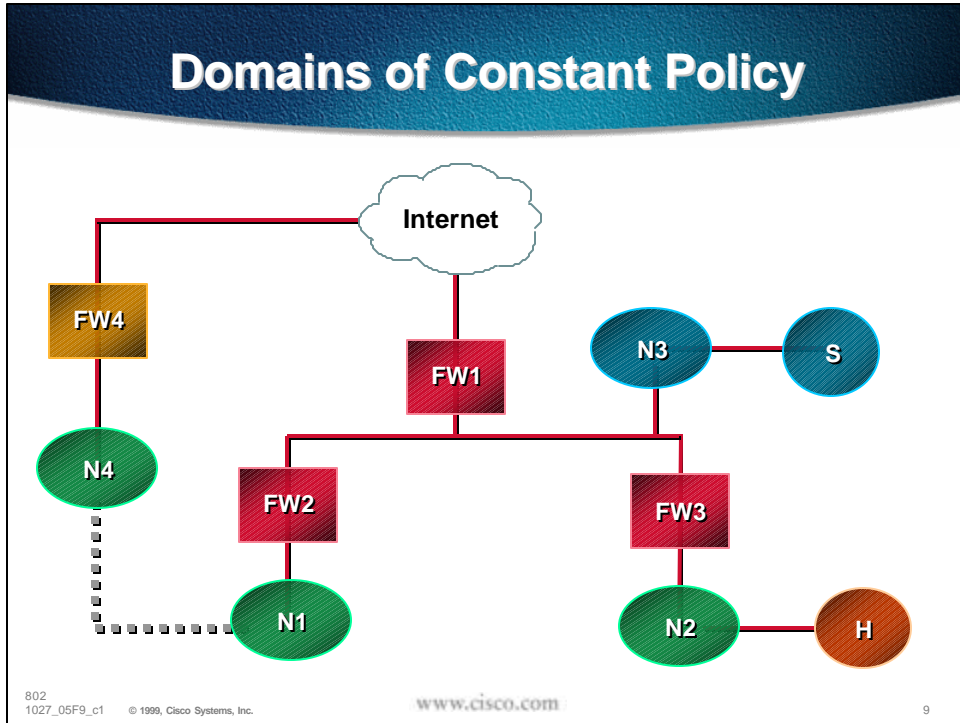

- **Network relationships**
- **Enforcement points**
 - Where are they?**
 - What are they capable of?**
 - What specific configuration is needed?**

8

- ## Policy Rules
- **Conditions**
 - Packet header
 - External conditions
 - User
 - **Actions**
 - Filter rules
 - Encryption requirements
 - Quality of service requirements
- 802
1027_05F9_c1 © 1999, Cisco Systems, Inc. www.cisco.com 10

Example Policy

If service is HTTP
if destination is S
if source is H
service level = Premium
permit
else if source is N1 or N4
permit
if source is N4
use tunnel

www.cisco.com

11

Compilation Phase

- **Prune global policy for each enforcement point**
- **Resolve conflicting rules**
 - Tunneling and filtering**
 - QOS and tunneling**
 - Resource limitations**

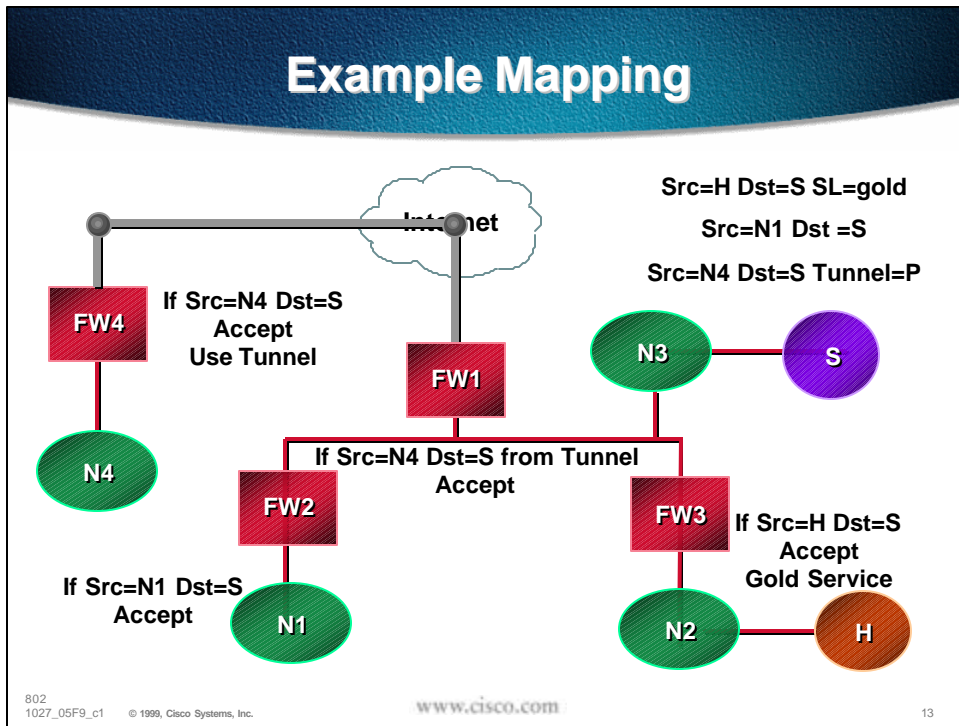

802

15

Policy Schema Standards

- **Goal**

Interoperability between policy tools

Identify core policy enforcement issues

- **Many different working groups**

IPSEC schema (IPSEC WG)

QOS schema (policy WG)

Policy languages

SPSL (IPSEC WG)

802

www.cisco.com

16

New Policy WG

- Targeting QOS domain
- Generated core schema draft
 - Specific domains inherit from the core classes
 - Schemas assume LDAP
 - Cooperation with the DEN schema

www.cisco.com

17

Transport Technologies

- Policy compiler to enforcement points

Telnet and command line interface

TFTP

SNMP

COPS

18

Common Open Policy Service

- A policy protocol designed for QoS
 - Close to RFC
- Single protocol, two uses
 - RSVP queries:
draft-ieft-rap-cops-06.txt
 - Policy provisioning:
draft-sgai-cops-provisioning.txt

802

© 1999, Cisco Systems, Inc.

www.cisco.com

19

System Feedback

- Variety of sources
 - syslog
 - SNMP traps
 - sniffing
- Adjust evaluation of policy

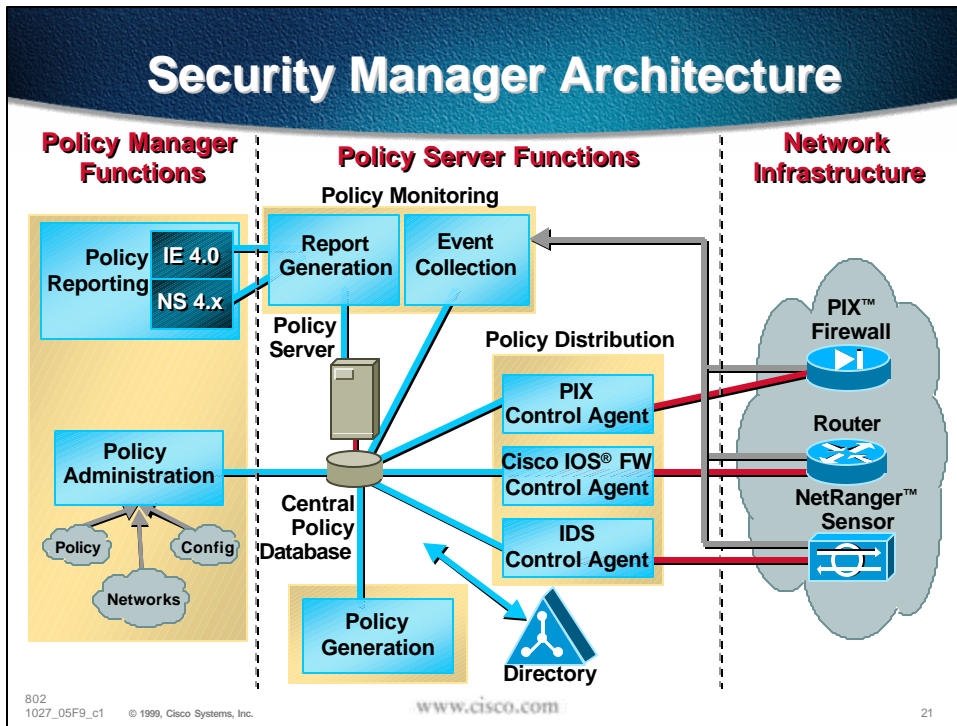

802

20

The Bottom Line

- Policy management can help create understandable, secure, maintainable network systems

802
1027_05F9_c1 © 1999, Cisco Systems, Inc. www.cisco.com 22

Translation Is Key

- **Generate consistent configurations from global rules**
- **Perform consistency checks between requested rules and generated hardware**
- **Use emerging policy mechanism standards**
